An aerial photograph of a large offshore oil rig, likely a jack-up rig, positioned in the middle of the ocean. The rig has a complex lattice structure with tall derrick masts. Two support vessels, which appear to be supply ships or tugboats, are positioned near the rig. The water is a deep blue-grey. The entire image is framed by a thin white border.

CORPORATE OVERVIEW

Verte Energies Limited is a fully indigenous Nigerian energy and engineering company incorporated under the Companies and Allied Matters Act (CAMA 2020). Our incorporation (RC 8114494) establishes it as a legitimate player within Nigeria's oil, gas, and construction sectors, guided by a strong governance framework and compliance with the Nigerian Oil and Gas Industry Content Development (NOGICD) Act.

Headquartered in Abuja, Verte Energies Limited is a diversified leading indigenous company with core interests in oil & gas upstream, midstream and downstream including civil construction sector and innovative technology solutions. Verte Energies has the sector expertise and is committed to being actively engaged in these sectors of the economy to deliver sustainable integrated energy solutions and infrastructure projects to support national growth and align with the Federal Government's industrialization agenda.

Our registration with the Nigerian Oil and Gas Industry Service Providers (OGISP) platform affirms our competence to execute major projects within both upstream and downstream environments.

Verte Energies offer tailored services across engineering design, procurement, construction, asset support, maintenance, project execution planning and management. We integrate multidisciplinary expertise to deliver reliable, cost-effective, and sustainable results that meet the expectations of clients, partners, and regulators alike.

OUR VISION

To be a leading globally respected technology driven indigenous company, delivering integrated energy, engineering and infrastructure solutions tailored to meet the unique needs of our clients with a commitment to safety, quality, innovation and sustainability.

We aspire to make African innovation a global standard for excellence, sustainability, and progress.

OUR MISSION

To provide safe, efficient, and innovative engineering, procurement, and construction solutions that strengthen Africa's energy and infrastructure systems while promoting local participation, environmental responsibility, and technological advancement.

CORE VALUES

People:

Respect, empower and maximize potential of each individual

Professionalism:

Upholding discipline, diligence, and accountability across all operations.

Integrity:

Conducting every aspect of business with honesty, fairness, and transparency.

Safety:

Prioritize people, asset, and the environment through robust Health, Safety, and Environment (HSE) policies.

Innovation:

Continuously developing adaptive and forward-looking solutions through research and value adding technologies.

Excellence:

Pursuing best-in-class standards in quality control, project delivery, and customer satisfaction.

Sustainability:

Operating responsibly to ensure positive environmental, social, and economic impact.

STRATEGIC OBJECTIVES

- Integrated Energy Solutions

Deliver complete oil, gas, and infrastructure services through unified project management frameworks.

- Capacity Building

Enhance indigenous workforce competence through skill development, technical training, and knowledge exchange.

- Operational Efficiency:

Deploy digital tools, and lean methodologies to ensure cost-effectiveness and top quartile delivery.

- Sustainability Leadership

Embed sustainable construction, low-emission operations, and responsible waste management across all projects.

- Partnership and Collaboration

Build trusted relationships with government agencies, global partners, and host communities to ensure long-term mutual growth.

- Innovation and Adaptability

Lead the adoption of smart technologies that improve safety, quality, and operational precision.

TECHNICAL CAPABILITIES AND HUMAN RESOURCES

VerTE Energies operates with a team of qualified professionals across multiple disciplines; civil, mechanical, chemical, and electrical engineering.

Our management team includes chartered engineers, project managers, quantity surveyors, and HSE officers with proven track records in oil and gas and infrastructure projects.

We adopt a **competence-based structure** that promotes knowledge retention, continuous improvement, and technical precision. Advanced project management systems—supported by software such as Primavera, AutoCAD, and Building Information Modelling (BIM)—enable data-driven decision-making throughout the project lifecycle.

Health, Safety, and Environment (HSE)

Our safety philosophy is based on prevention, awareness, and accountability. A zero-incident target underpins every project, reinforced through continuous staff training, routine inspections, and regulatory audits.

Certifications & Standards

We operate in accordance with ISO 9001 (Quality Management), ISO 14001 (Environmental Management), and ISO 45001 (Occupational Health and Safety) standards, ensuring compliance and operational excellence.

SERVICES PORTFOLIO

Oil And Gas Services

- Oil field logistics and production support
- Pipeline construction, inspection, and surveillance
- Gas distribution infrastructure and pressure vessel maintenance
- Installation and calibration of safety and process control equipment
- Pipeline integrity management, cleaning, and corrosion protection
- Risk analysis, project planning, and emergency response solutions
- Facility design, fabrication, and commissioning

Verde Energies provides comprehensive upstream and downstream support services that enhance operational efficiency and facility reliability.

Engineering, Procurement, Construction, and Maintenance (EPCM)

Our Project and Engineering directorate handles complex engineering projects from concept to start-up.

Civil and Structural Engineering

- Roads, bridges, culverts, and drainage networks
- Earthworks, piling, and foundation construction
- Industrial building and estate development
- Reinforced concrete and steel structures
- Environmental and flood management systems

Expertise Available:

- Integrated Field Development Plan
- Feasibility Study
- Development Concept Engineering
- Project Execution Planning And Management For Capital Projects
- Independent Reviews & Assurance Of Project Execution Plans And Readiness
- Owners Team Support For Capital Project Execution
- FEED And Detailed Engineering Management
- Procurement Of Certified Equipment, Instruments And Spare Parts
- Maintenance, Refurbishment And Facility Upgrades
- Fabrication And Construction Management Support
- Integration Of Automation And Control Systems

Fabrication And Mechanical Works

We maintain precision fabrication and repair capability through its mechanical workshops and mobile units.

- Pressure vessel design and manufacture
- Steel structure fabrication and onsite assembly
- Tank cleaning, testing, and coating
- Piping, rigging, and equipment alignment
- Structural modification and mechanical integrity restoration

Procurement And Technical Support

- Global sourcing and vendor coordination
- Quality assurance and inspection services
- Documentation and certification management
- Transport logistics and warehousing for project equipment

Marine, Audit, And Inspection Services

Adopting international best practices in marine and petroleum logistics, Verte Energies offers:

- Ship management, chartering, and brokerage services
- Marine audits, vetting, and ISM/ISPS inspections
- Pre-shipment and bulk loading inspections
- Cargo quality (Q&Q) control and super-cargo services
- Vessel condition, valuation, and draft surveys
- Hull and machinery inspections
- Bunker and discharge surveys

Laboratory And Testing Services

- Quality testing of petroleum products
- Chemical composition and performance analysis
- Environmental sampling and contamination control
- Research and development in petroleum chemistry

REGULATORY COMPLIANCE AND CERTIFICATION

VerTE Energies Limited meets all statutory requirements for the Nigerian energy and construction sectors.

Corporate Affairs Commission (CAC):

RC 8114494

Tax Identification Number (TIN):

32556913-0001

OGISP Registration:

Active with NCDMB/NUPRC

Quality Management System

ISO 9001:2015

Specialised Category:

Major Construction Services /
Civil Engineering Construction

Major Category:

Rehabilitation, Upgrade, Fabrication, Minor Civil and Mechanical Works,
Engineering Services (FEED, Detailed Engineering, Concept Engineering)

Local Content Compliance:

In full alignment with the NOGICD Act, 2010.

Insurance and Compliance:

Maintains employee compensation, public liability, and project risk insurance in accordance with national law.

Through continuous auditing, licensing renewal, and transparent documentation, we credibility and long-term regulatory trust.

CORPORATE GOVERNANCE AND MANAGEMENT

Verte Energies' governance system is designed to ensure accountability, performance efficiency, and stakeholder confidence.

We operate through a structured board of directors and executive management team who supervise day-to-day operations in compliance with CAMA 2020 and good corporate governance principles.

We operate under a corporate governance model that ensures accountability, ethical conduct, and transparency. Our management team brings together a blend of technical, financial, and maritime experience.

Our leadership structure reflects competence, diversity, and integrity ensuring that we maintain strong internal control and alignment with international governance standards.

Governance Philosophy:

Corporate governance at Verte Energies emphasises transparency, compliance, and ethical conduct. Financial reporting, procurement processes, and contract management follow international best practices. Regular internal audits and management reviews support continuous improvement.

BOARD OF DIRECTORS

Anthony Nwachukwu Nwokoro

CHAIRMAN / CHIEF EXECUTIVE OFFICER (CEO)

Anthony Nwachukwu Nwokoro is a distinguished construction, infrastructure, and energy executive whose career of over 25 years reflects an unwavering commitment to strategic leadership, operational excellence,

and measurable commercial impact. Across boardrooms, construction sites, and energy facilities, he has consistently demonstrated the ability to translate complex challenges into tangible outcomes, earning his place among the most respected figures in Nigeria's built environment and energy sectors.

At the core of Anthony's corporate career is his role as Executive Director and Chief Operating Officer of Stefanutti Stocks Hapel Ltd, a high-profile joint venture between Stefanutti Stocks SA, one of South Africa's foremost publicly listed construction groups, and Hapel Nigeria Limited. In this capacity, he carries full responsibility for strategic direction, operational performance, and corporate governance across the company's Nigerian operations. His most defining contribution remains his role as Chief Negotiator in the landmark merger between Stefanutti Stocks SA and Hapel Nigeria Limited, a cross-border, multi-jurisdictional transaction that he led from strategy to conclusion with exceptional commercial precision and stakeholder diplomacy. Under his leadership, the company has overseen project portfolios exceeding USD 20million, directed a workforce of over 500 employees, and secured highvalue contracts across government, parastatal, and private sector segments.

Anthony also serves as the Chairman / Chief Executive Officer (CEO) of Verte Energies Limited, a fully indigenous Nigerian energy and engineering company headquartered in Abuja, incorporated under CAMA 2020 and fully compliant with the Nigerian Oil and Gas Industry Content Development (NOGICD) Act. The company delivers integrated solutions across oil and gas services, engineering, procurement, construction and maintenance (EPCM), civil and structural engineering, marine inspection, and laboratory testing, operating in accordance with ISO 9001, ISO 14001, and ISO 45001 standards. At Verte Energies, Anthony leads with a governance model built on transparency, ethical conduct, and a long-term vision to become a pan-African brand synonymous with engineering excellence, innovation, and sustainability.

Beyond his corporate roles, Anthony is the Founder and Chief Executive Officer of Ver-amount Construction Ltd, a luxury residential development and estate construction firm serving Nigeria's premium property market, and of Tile Gallery Nigeria Ltd, a specialist enterprise focused on the sourcing, supply, and contracting of premium natural stone and luxury tiling products for high-end residential, commercial, and hospitality projects. Together, these ventures reflect his deep understanding of the construction value chain and his ability to build complementary businesses of lasting commercial value.

Anthony holds a Bachelor's degree in Management from the University of Nigeria, Nsukka. His academic grounding, combined with decades of applied executive experience across multinational construction and indigenous energy enterprises, has shaped a leader of exceptional breadth. He is a strategist, a negotiator, and a builder in every sense, whose contributions to Nigeria's infrastructure and energy landscape continue to define the standard for executive leadership in the sector.

Olusayo Ademola Ajayi

NON-EXECUTIVE DIRECTOR

Olusayo is currently Engineering & Project Director at Isto Vantage Ltd. He is a seasoned and multiple award-winning project and engineering management executive with over 25 years of international experience across Africa, Europe, North America and Middle East in the upstream and downstream sectors of oil and gas industry. A highly accomplished professional known for his transformative leadership, technical excellence and passion for continuous improvement with a proven track record of delivering large-scale, high-impact complex capital projects, including first-of-their-kind developments from concept selection through execution. His leadership is defined by a focus on operational excellence, asset integrity and value optimisation across the project lifecycle.

Olusayo is a trailblazer in technological innovations and has held multiple senior leadership roles within Shell E&P Company, Oryx Gas to Liquids and FFoundation Edge Inc. He brings deep expertise in front-end development, field development planning, engineering management, capital project execution planning & management, risk & opportunity management, independent project reviews & assurance and asset management. He is highly regarded for optimising designs and production systems to maximise availability while controlling costs, and for driving continuous improvement across multi-disciplinary engineering and project teams.

Olusayo holds a Doctor of Philosophy (Hon) in Project Leadership & Engineering Management from AMU in USA, an MBA from University of Liverpool in UK, a Postgraduate Certificate in Oil & Gas Engineering from

Shell/Robert Gordon University, Aberdeen, Scotland training scheme and a Bachelor of Science (B.Sc.) in Mechanical Engineering from Obafemi Awolowo University in Nigeria.

Olusayo is deeply committed to mentoring, talent development and building high-performing teams. He is actively involved in industry associations, serving as board member to promote corporate governance in some business entities and on global professional accreditation panels contributing to engineering and project management discourse. He is a member of several professional bodies such as Nigerian Society of Engineers (NSE), Association of Project Management (APM) in UK, Association of Professional Engineers and Geoscientists of Alberta (APEGA) in Canada, Project Management Institute (PMI) in USA, Project Management Association of Canada (PMAC), American Society of Engineering Management (ASEM), American Society of Mechanical Engineers (ASME) and Chartered Management Institute (CMI) in UK. He has multiple professional certifications such as Fellow of Nigerian Society of Engineer (FNSE), Project Management Professional (PMP) in USA, Chartered Project Professional (ChPP) from the Association of Project Management (APM) in the UK and a licensed Professional Engineer in Canada (P.Eng.).

He has been acknowledged with several recognitions and professional awards. His recent accolade in 2026 includes the Most Influential Leader Driving Innovation in Global Oil & Gas from the Empire Magazine.

Adebola Evelyn Owede

NON-EXECUTIVE DIRECTOR

Adebola Owede is a CFA Charterholder and senior finance professional with over 20 years of experience across treasury, capital markets, and strategic finance. She has a proven track record of leading complex financial initiatives, including financial modelling, capital optimization, and investment analysis, in global banking environments such as TD Bank and Zenith Bank. Known for her strategic mindset and strong stakeholder leadership, Adebola partners with senior executives to deliver data-driven insights that support critical business decisions, drive growth, and enhance financial performance.

Ebele Ndukwe Radizi

COMPANY SECRETARY/CHIEF LEGAL OFFICER

Ebele N. Radizi is a seasoned legal and consulting professional with over 20 years of experience spanning private legal practice, in-house advisory roles, and international development consulting. Her work covers complex commercial transactions, contract negotiations, infrastructure and project financing, including greenfield and brownfield developments, public-private partnerships, and engagements across the energy and natural resources sectors.

She is widely recognised for her strong negotiation, deal-closing, and client relationship skills, and has advised both corporate and public-sector clients on mergers and acquisitions, joint ventures, insolvency, divestitures, and corporate governance matters. Ebele has also served as Company Secretary for major organisations and brings extensive experience in project management, organisational restructuring, and the establishment of new departments and programmes to improve operational effectiveness and profitability.

Ebele is a Barrister and Solicitor of the Supreme Court of Nigeria, a Chartered Secretary and Administrator (ICSAN), and a Notary Public of Nigeria. She is an active member of several international and professional legal bodies and brings strong capabilities in strategic planning, regulatory and policy analysis, conflict resolution, and continuous improvement initiatives. Fluent in English and Igbo, with intermediate proficiency in German, she brings a global perspective and disciplined legal insight to complex, multi-stakeholder environments.

MANAGEMENT

Terngu Utim

DIRECTOR (COMMERCIAL AND NEW BUSINESS DEVELOPMENT)

Terngu Utim is a seasoned geoscientist and energy executive with over 27 years of international experience in oil and gas exploration, asset development, and commercial strategy.

As Director of Commercial & New Business

Development at Verde Energies Ltd, he leads business development initiatives, opportunity evaluation, technical and commercial proposals, and strategic partnerships that strengthen the company's market position.

Throughout his career, Terngu has held leadership and technical roles with Shell, Murphy Exploration & Production, Nexen Petroleum USA, and XPSG LLC, delivering value across the full upstream asset lifecycle—from exploration and reservoir characterization to field development, production, and asset optimization. He has successfully led multidisciplinary teams, contributed to the addition of hundreds of millions of barrels of oil equivalent (MMboe) to global energy portfolios, pioneered the application of AI and machine learning in subsurface interpretation, and delivered technical training for leading international petroleum organizations. He holds an M.Sc. in Petroleum Geoscience from Royal Holloway, University of London, alongside postgraduate and undergraduate qualifications in petroleum geoscience and geology.

Samson Onoh

GENERAL MANAGER (PROJECTS & OPERATIONS PORTFOLIO)

Samson Onoh is a seasoned, APM certified Project Practitioner with over 30 years industry experience in facilities development, Engineering design and Construction. He led several multidiscipline project teams to deliver

major greenfield and brownfield opportunities across numerous Assets in the shallow and deep offshore fields of Nigeria. He started his career as a project engineer for PLS Nacap International (JV with B+B Oil & Gas Nigeria Ltd) where he delivered major oil and gas production facilities, flowlines, delivery lines and trunklines across key oil and gas fields in the East and West of Nigeria.

Samson then joined Shell as an experienced Mechanical Project Engineer with the Bonga Asset Engineering and Construction team. He helped the team to complete the rigorous post first oil Project-to-Asset handover and led various project teams to liquidate key post project handover legacy project over the years making the Bonga Asset a great investment case. Samson spent some time with the Static Mechanical Engineering Discipline team of Shell Nigeria Deep Water Projects Organization where he functioned for several years as a technical authority TA-Static Mechanical – Piping and valves. He later moved to the Front-End Engineering team where he managed all pre-DG3 opportunities required to address key Asset integrity threats, risks and opportunities on Bonga FPSO Topsides. His key role was the development and delivery of engineering solutions for Materials Projects, Major/Minor Projects designed to resolve asset integrity issues and systems obsolescence for Bonga FPSO. He later became the Portfolio Project Manager and

the custodian of the SNEPCo Brownfield Portfolio Project Execution & Management Manual and also managed the DWP Project Maturation funnel. Samson is known for his snag for efficient execution, with consistent eye on Projects/ Organizational score cards around cost and delivery timelines. He became the go to person for delivery of constructability reviews across Shell companies in Nigeria with a mantra; 'Measure twice and cut once'. As GM (Projects & Operations Portfolio) for Verte Energies, Samson provides strategic leadership for technical evaluation, planning and execution of business opportunities in Nigerian Oil and Gas sector. He leads a highly competent team that identifies, screens and delivers unique engineering solutions, strengthening Verte Energies' competitive position in the market.

Collins Okaru

GENERAL MANAGER (TECHNICAL)

Collins Okaru is an accomplished project and engineering leader with extensive international experience delivering complex capital projects across the global energy industry. Over the course of his career, he has held key

engineering and project management roles supporting major international operators and engineering consultancies, including Shell, TotalEnergies, Xodus Group, the defunct Nigerian Agip Oil Company, TSKJ/JBN and NPSG Global. His expertise spans the complete project lifecycle—from opportunity maturation, concept selection, feasibility studies and Front-End Engineering Design (FEED) through detailed engineering, procurement, offshore execution, commissioning, start-up and operational readiness.

Recognised for his strategic leadership and technical excellence, Collins has successfully led multidisciplinary teams responsible for delivering high-value offshore and subsea developments across Africa, Europe, Asia, and the Middle East. His professional experience encompasses subsea production systems, SURF developments, offshore pipeline, riser and umbilical installations, brownfield modifications, asset integrity, engineering assurance, project execution planning, project controls, contract administration, risk and opportunity management, stakeholder engagement and capital project governance.

Throughout his career, he has consistently demonstrated the ability to deliver technically challenging projects safely, efficiently and within commercial objectives while maintaining the highest standards of quality and operational

excellence. Collins is widely respected for integrating engineering expertise with commercial insight to optimise project performance, strengthen governance, improve execution efficiency, and create sustainable value for clients and stakeholders. His leadership philosophy is founded on integrity, accountability, innovation, collaboration, and the development of high-performing multidisciplinary teams. He is a passionate advocate for indigenous capacity development and the transfer of global best practices to strengthen Africa's engineering and energy sectors.

He is a Chartered Engineer (CEng) registered with the UK Engineering Council, a Chartered Petroleum Engineer with the Energy Institute (United Kingdom), and a Registered Engineer with the Council for the Regulation of Engineering in Nigeria (COREN). He is also a certified Project Management Professional (PMP), reflecting his commitment to internationally recognised standards in engineering and project delivery. Collins holds a Master of Science (MSc) in Offshore and Ocean Technology (Subsea Engineering) from Cranfield University, United Kingdom; a Master's degree in Project Management and a Bachelor of Engineering (B.Eng.) in Electrical and Electronics Engineering from the Federal University of Technology, Owerri (FUTO).

His multidisciplinary academic background complements his extensive practical experience in delivering major energy infrastructure projects. As General Manager (Technical) at Verte Energies Limited, Collins provides strategic leadership for the Company's engineering, project delivery and business growth initiatives. He is responsible for strengthening project delivery standards, governance, advancing engineering capability, and expanding strategic partnerships to position Verte as partner of choice, globally respected technology-driven indigenous engineering company delivering integrated energy and infrastructure solutions throughout Africa and beyond.

SUSTAINABILITY AND SOCIAL IMPACT

Verde Energies is committed to the principle that economic growth must not come at the expense of environmental or social integrity.

Its sustainability model is built on three key pillars:

Environmental Stewardship:

We are dedicated to environmentally responsible operations and the mitigation of our operational footprint. This includes conducting Environmental Impact Assessments (EIAs) for major projects, implementing robust waste management protocols, and prioritizing technologies that reduce emissions and energy consumption.

Human Capital Development:

Beyond regulatory compliance, we view manpower development as a business imperative. We are committed to operating a structured Graduate Trainee Program and providing continuous skills upgrading for our entire workforce, focusing on critical technical, safety, and leadership competencies.

Community Relations:

Our community engagement model is built on partnership, mutual respect, and shared value. We will engage transparently with host community leadership to sign Global Memorandums of Understanding (GMOUs) where applicable, ensuring our presence contributes directly to local employment, SME development, and social empowerment initiatives.

Governance and Accountability:

Ensuring that all sustainability actions are measurable, transparent, and in compliance with environmental legislation.

We actively collaborate with local authorities to promote reforestation, renewable energy, and education programmes.

PROJECT PICTORIALS AND EXPERIENCE PORTFOLIO

INTERNATIONAL PARTNERSHIPS AND OUTLOOK

VerTE Energies collaborates with global engineering consultants, manufacturers, and service providers to enhance technical capability and compliance with international standards. These alliances extend across Europe, Asia, and North America, providing access to advanced tools, materials, and engineering methodologies.

Future Outlook

- Expansion into renewable energy systems, including solar, wind, and biofuel projects.
- Establishment of regional project offices in West and Central Africa.
- Development of digital project monitoring platforms and integrated supply chain systems.
- Pursuit of ISO certification renewals and membership in international engineering bodies.

Our long-term vision is to become a pan-African brand synonymous with reliability, innovation, and sustainable engineering.
